

REPRESENT LABS INC.

Investment Milestone Proposal

\$1,000,000 Milestone-Based Investment

**\$50,000 ACTIVATION AT SIGNING, EVERY
ADDITIONAL DOLLAR GATED BY VERIFIED USER
PROOF**

THE ASK

\$50,000 *to start.*

Initial Activation Investment: \$50,000 for 1% equity, released at signing.

Up to **an additional \$950,000** available through milestone-based financing, released only after agreed user, product, retention, and revenue benchmarks are met.

AT SIGNING	MILESTONE 1	MILESTONE 2	MILESTONE 3	MILESTONE 4	MILESTONE 5
\$50K	\$50K	\$150K	\$200K	\$250K	\$300K

You fund proof, not promises. The first **\$50,000** is the only capital committed before 200 registered users (including at least 100 verified users) exist, and no stage after it releases until the prior stage's target is independently verified.

THE MISSION

Upgrading governance.

Modern governance still runs on infrastructure built before the internet: paper petitions, unverified polls, slow consultations. Represent is building the verified citizen layer that should sit underneath all of it: identity-checked participation, one person one vote, real numbers nobody can dismiss.

MISSION

Acquire verified users. Validate the market.

Growth is the only metric that matters at this stage. Every dollar of capital, every operating decision, is pointed at the user count.

STRATEGY

Prove the market exists in Alberta. 50,000 verified.

A population of 4.6M with a fixed October 19, 2026 referendum is the ideal proving ground: small enough to dominate, public enough to matter.

VISION

Project the Alberta result onto every major metro.

50K verified in Alberta is a model a strategic acquirer or growth investor can project into New York, LA, Dallas, London, Tokyo, and the platform-expansion path follows the same template.

WHY GROWTH IS THE PRIORITY

- Verified user count is the single asset that proves the category. Every other metric (retention, revenue, contracts) follows from it.
- The referendum is a one-shot acquisition catalyst. Capital that arrives after it cannot buy what capital arriving before it can.
- Investor capital is the accelerator: it converts a self-funded campaign into a defensible market position.

The mission is growth. Alberta is the proof. Every metro after it is the prize.

WHY NOW

Alberta has set the date.

- Alberta has a fixed **October 19, 2026** referendum timeline.
- Recent citizen-led activity has shown real demand for civic participation.
- Legacy petition systems can be slow, challengeable, and vulnerable to delay.
- Represent can test verified civic participation in a real market under real urgency.
- The milestone structure lets investors fund proof, not speculation.

The referendum creates urgency. The verified civic network creates the company.

October 19 creates the first concentrated test of demand; the verified civic network is the long-term asset.

WHAT'S ALREADY BUILT

The product is live today.

- **iOS app: approved and live on the App Store**, with identity verification, location-gated voting, citizens-only ballots, discussion, and subscriptions
- **Browser voting: live.** Anyone can verify and vote from a shared link, with no app install
- **The Shadow Referendum: running now.** All 10 official referendum questions, verbatim
- **Identity verification: operational.** Government ID plus a liveness check through a certified provider; documents are never stored on our servers
- **Organization tools: built.** Governance solutions for unions, associations, and municipalities

We are building the verified public-consensus infrastructure that civic life will run on. The operating system for the future of governance.

ACTIVATION + FIVE MILESTONES · EIGHTEEN MONTHS

Milestone Summary

#	MILESTONE · WINDOW	WHAT IT PROVES	FUNDING
·	Activation: foundation & launch AT SIGNING (JUL)	Foundation + campaign engine, before August	\$50,000
1	Prove: first verified Albertans MONTH 1 (AUG)	People sign up; the engine scales on proof	\$50,000
2	Alberta Verified: the Referendum Sprint MONTHS 2-4 (SEP → OCT 18)	Albertans will verify identity at scale	\$150,000
3	The Results Moment & Retention MONTHS 4-7 (OCT 19 → JAN)	The platform survives its event; users stay & engage	\$200,000
4	Provincial Density & Expansion MONTHS 7-12 (FEB → JUN 2027)	Alberta-wide reach + first organization adoption	\$250,000
5	Scale & Revenue MONTHS 12-18 (JUL → DEC 2027)	The market exists and will pay	\$300,000

CUMULATIVE VERIFIED-USER TARGETS

200 registered / 100+ verified gate → 1,000 verified (M1) → 3,500 (M2, by Oct 18) → 10,000 (M3) → 25,000 (M4) → **50,000** (M5)

MILESTONE ACCELERATION

If a milestone's benchmarks are met materially ahead of its window (30+ days early), the subsequent tranche releases on demonstration of the benchmarks, without waiting for the calendar.

ACTIVATION · AT SIGNING

\$50,000
1% EQUITY

Activation

BENCHMARK REQUIRED TO UNLOCK MILESTONE 1

200 registered users, including at least 100 verified users, with verification-funnel data documented and reviewed by both parties.

WHAT THIS PROVES

The team can launch the company and acquire the first real Albertans.

USE OF FUNDS**Legal, compliance & investor readiness**

Incorporation, shareholder agreement, advertising compliance

Product & verification readiness

Onboarding polish, verification copy, funnel tracking

User acquisition & campaign distribution

First paid acquisition tests, creative production, founder outreach

Operations & founder execution

Launch coordination, partner meetings, administrative overhead

MILESTONE 1 · PROVE

\$50,000
1% EQUITY

Milestone 1

BENCHMARK REQUIRED TO UNLOCK MILESTONE 2**1,000 verified users** · Android live on Google Play.

WHAT THIS PROVES

The engine scales on real data. Channels work, conversion can be measured, the public can see verified turnout.

USE OF FUNDS

User acquisition & campaign distribution	Scaled paid + organic in best-performing channels
Public trust & reporting	First public verified-turnout report
Product & verification readiness	Funnel + analytics infrastructure
Operations & founder execution	Continuing month-one execution

MILESTONE 2 · ALBERTA VERIFIED · THE REFERENDUM SPRINT

\$150,000
3% EQUITY

Milestone 2

BENCHMARK REQUIRED TO UNLOCK MILESTONE 3**3,500 verified users** by Oct 18 (floor 2,500) · press releases issued.**WHAT THIS PROVES***Albertans will verify at scale.***USE OF FUNDS****User acquisition & campaign distribution**

Paid acquisition, creators, town halls, road campaign, QR

Public trust & reporting

Weekly tally, PR & op-ed placement

Operations & founder execution

Campaign coordinator, partner outreach, on-the-ground field operations

Product & verification readiness

Verification at scale, reliability under load

MILESTONE 3 · THE RESULTS MOMENT & RETENTION

\$200,000
4% EQUITY

Milestone 3

BENCHMARK REQUIRED TO UNLOCK MILESTONE 4

10,000 verified users (floor 7,500) · results-comparison report published · 2+ organization pilots started.

WHAT THIS PROVES

The platform survives its activation event and converts retention into a permanent civic asset.

USE OF FUNDS**Public trust & reporting**

Referendum Results Night, comparison report, Alberta Verified Dashboard

User acquisition & campaign distribution

Retention + sustained acquisition

Product & verification readiness

Dashboard build, retention features

Operations & founder execution

Field organizers, partner support

MILESTONE 4 · PROVINCIAL DENSITY & EXPANSION

\$250,000
5% EQUITY

Milestone 4

BENCHMARK REQUIRED TO UNLOCK MILESTONE 5

25,000 verified users · at least one organization or municipal pilot underway (paid or unpaid).

WHAT THIS PROVES

Provincial density and early organization adoption.

USE OF FUNDS

User acquisition & campaign distribution	Provincial road campaign, town halls, sustained paid
Product & verification readiness	Scaling, performance, dashboard upgrades
Public trust & reporting	Alberta case-study production
Operations & founder execution	Regional ops, organization-pilot enablement

MILESTONE 5 · SCALE & REVENUE

\$300,000
6% EQUITY

Milestone 5

FINAL-STAGE BENCHMARK: FULL 20% ONLY ISSUED WHEN THIS STAGE FUNDS

50,000 verified users · first paid contract (government or organization) · **\$10,000+ monthly recurring revenue** · Seed-ready data room.

WHAT THIS PROVES

Verified civic participation becomes recurring revenue.

USE OF FUNDS

User acquisition & campaign distribution

Sustained province-wide acquisition

Operations & founder execution

First marketing/community hire, scaled execution

Legal, compliance & investor readiness

Seed round preparation, data room

Product & verification readiness

Security, scaling, dashboard scaling

HOW THE BUSINESS WORKS

The economics.

ACQUIRING VERIFIED USERS

We model a blended cost of **\$10–15 per verified user**. Paid acquisition runs \$20–25; the referendum’s organic reach, partner-led votes, creator distribution, and a no-install browser flow pull the blend well below that. The October 19 referendum is the unpaid acquisition engine. Paid spend supplements it, it does not carry it.

HOW THE \$1,000,000 REACHES 50,000 VERIFIED USERS

User acquisition & campaign distribution	~\$600,000
Founder execution & operations	~\$270,000
Product, legal & investor readiness	~\$130,000

HOW REPRESENT EARNS

- **Organizations:** unions, associations, and municipalities pay for governance & voting tools (\$5K–\$50K annual contracts). The near-term revenue engine.
- **Government & institutional:** verified public-consultation tooling, sold as contracts.
- **Consumer premium:** power features (analytics, monitoring) at \$5/mo for engaged users.

Milestone 5’s **\$10,000+ MRR** target is the proof that at least one of these lines converts at scale.

RISKS & DEFENSIBILITY

What could go wrong, and why we win anyway.

RISKS & MITIGATIONS

Referendum delayed or cancelled

The platform is not referendum-dependent. The verified network and the organization/government revenue paths continue; targets shift to the same benchmarks on a later timeline.

Verification conversion below model

User benchmarks carry a floor and one 30-day extension. The no-install browser flow already removes the largest drop-off, and the paid/organic mix re-weights to whatever converts.

Regulatory & advertising compliance

Elections Alberta third-party advertising rules are assessed and cleared before any paid referendum advertising. The platform is explicitly independent and non-binding.

Single-channel dependency

App, browser flow, and organization tools are already shipped. The company is not betting on one channel or one feature.

WHY REPRESENT WINS

- **Verification is the moat.** Every user is a real, ID-checked human. Competitors built on email sign-ups cannot match the credibility, or fake the count.
- **First mover on verified civic** at a real, dated, high-salience event.
- **Network effects.** The verified-citizen graph compounds: the next vote happens where the verified voters already are.

Equity Terms

\$5,000,000

PRE-MONEY

\$6,000,000

POST-MONEY

20%

FULLY-FUNDED

The investment of \$1,000,000 is offered at a **\$5,000,000 pre-money valuation (\$6,000,000 post-money) for 20% fully-funded.**

The \$5,000,000 pre-money reflects a live, App Store-approved product (verification, browser voting, and organization tools already shipped), a once-in-a-decade acquisition catalyst in the October 19 referendum, and a revenue path through organizations and government beyond consumer subscriptions. It is set to leave clear headroom for a step-up at the Seed round.

Proposed structure. Equity released pro-rata with capital: rather than transferring the full 20% on signing, shares are issued as each milestone funds (1% at signing, then 1%, 3%, 4%, 5%, and 6% across Milestones 1–5, totalling 20% at full funding). This protects both sides: the investor never holds equity beyond capital actually invested, and the company never sells a fifth of itself against funds that benchmarks may not unlock. Alternative implementations with identical economics (milestone-priced share issuances, or warrants vesting per milestone) are acceptable; **Final structure and documentation should be prepared by legal counsel in the form both parties agree is most appropriate.**

If the investor requires the full 20% on signing, the company requests a reciprocal commitment: milestones become obligations subject only to benchmark achievement (not discretionary), with an agreed remedy (equity clawback or buy-back at cost) for any milestone not funded after benchmarks are met.

THE GOAL

Toward the Seed Round.

The 18-month milestone plan is engineered to produce a **Seed-ready company by late 2027**. The benchmarks across Milestones 4 and 5 (verified users, retention, first paid contract, monthly recurring revenue, and a Seed-ready data room) are precisely the traction signals investors price at the next round.

This is how investor capital becomes investor return: not through dividends or interest, but through stake appreciation at the Seed round valuation step-up.

Beyond the Seed round, the verified-citizen network creates strategic value for civic-tech, polling, identity-verification, and government-services acquirers, a horizon outside the scope of this 18-month proposal.

WHAT ANCHORS THIS RANGE

A proven acquisition engine

50,000 government-ID verified users at a blended cost of \$10–15 each, a working CAC most civic platforms cannot produce at any valuation.

A defensible identity graph

Every user is ID-checked. Competitors built on email signups cannot replicate the count or the credibility.

Recurring revenue, not just engagement

\$10K+ MRR from organization or government contracts converts the base into a multi-product company.

A replicable playbook

Alberta's 50,000 verified users is a template a strategic investor can project onto NYC, LA, Dallas, London, Tokyo. The next round isn't pricing Alberta; it's pricing the model.

CONSERVATIVE ILLUSTRATIVE SCENARIOS

SEED ROUND SCENARIO	POST-MONEY	INVESTOR STAKE (POST-DILUTION)	RETURN ON \$1M
Base	\$20M	16% = \$3.2M	3.2×
Upside	\$40M	16% = \$6.4M	6.4×

Scenarios are illustrative and intentionally conservative. They assume a representative ~20% dilution at the Seed round. Actual valuation depends on traction, market conditions, and competitive dynamics at the time of raise.
