MILESTONE ONE – INVESTOR BRIEF

Building Alberta's First Verified Citizen Network

OBJECTIVE

Represent is seeking capital to execute Milestone One: the creation of Alberta's first verified citizen network.

Over the next quarter, Represent will focus exclusively on Alberta user acquisition, verification, and engagement across five strategic constituencies: regionally engaged citizens, citizen accountability participants, municipal residents, youth, and community organizations.

Represent is politically neutral and designed to serve citizens, organizations, and communities across the full political spectrum.

The goal is not broad marketing. The goal is to prove that real citizens will verify identity, verify residency, and participate in geographically authenticated votes on issues that affect their lives.

MILESTONE TARGET

10,000

Verified Albertans

Each verified user confirms

- Identity

- Residency

- Geographic eligibility

- One person, one voice

This establishes a defensible civic network: real people, in a real place, eligible to participate in decisions affecting their communities.

STRATEGIC VALUE

A verified citizen network is not an email list. It is a civic infrastructure asset.

At 10,000 verified Albertans, Represent demonstrates:

Proof of demand

Proof of trust

Proof of identity and residency verification

Proof of citizen engagement

Early revenue validation

A repeatable deployment model for future jurisdictions

This milestone transforms Represent from a governance technology platform into a functioning verified civic network with measurable adoption, engagement, and monetization potential.

Five Alberta Acquisition Verticals

01 Regional Identity & Civic Engagement Communities

Message: Alberta's Future Belongs to Albertans

Focus: Verified Alberta-only consultation on provincial issues including autonomy, resource development, pensions, public policy, and regional priorities.

02 Citizen Accountability Network

Message: Government Should Listen Every Day

Focus: Continuous citizen consultation on taxation, affordability, healthcare, education, public safety, energy, infrastructure, and government priorities.

03 Municipal Communities

Message: Your Neighbourhood. Your Voice.

Focus: Ward-level and neighbourhood-level consultation on zoning, taxes, development, safety, transit, infrastructure, and local priorities.

04 Youth & Students

Message: Don't Wait Your Turn. Verify Your Voice.

Focus: Voice Now and Represent Academy, combining verified youth participation with governance literacy and civic education.

05 Community Organizations

Message: Your Members. Your Mandate.

Focus: Verified voting and consultation for condo boards, community associations, sports organizations, non-profits, faith communities, and member-based organizations.

REVENUE VALIDATION

Milestone One validates multiple revenue streams

Organizations

NEAR-TERM REVENUE ENGINE

Unions, associations, and municipalities pay for governance and voting tools – \$5K–\$50K annual contracts.

Government & institutional

CONTRACT REVENUE

Verified public-consultation tooling sold to government and institutional buyers as contracts.

Consumer premium

\$3 / MONTH

Power features – analytics, monitoring – for engaged users beyond the free core.

The first objective is not to maximize revenue immediately. It is to prove that verified citizens and organizations will participate, return, and pay for trusted decision-making.

EXPANSION PATH

Prove the model in Alberta. Then export it.

Represent will remain operationally focused on Alberta during Milestone One while positioning the platform for broader deployment.

The strategy is simple: prove the model in Alberta, then export the model to every geography where citizens seek verified voice, trusted decision-making, and meaningful participation.

INVESTMENT PURPOSE

Investor capital funds the first measurable proof point: a verified Alberta network that becomes the foundation for national and international expansion.

Capital will be used for

- | | |
|-------------------------------|----------------------------|
| → Alberta user acquisition | → Verification costs |
| → Issue-based campaigns | → Community ambassadors |
| → Governance literacy content | → Organizational pilots |
| → Product improvements | → Early revenue validation |

STRATEGIC OUTCOME

Upon completion of Milestone One, Represent will possess something that does not currently exist:

A verified, geographically authenticated citizen network capable of measuring public sentiment at the provincial, municipal, organizational, and community level in real time.

That network becomes the launch asset for Western Canada, the Anglosphere, and global civic infrastructure.

Represent is proving the future of governance in Alberta first — then scaling it to the world.
